INTRODUCING OUR SLINGS

At Levomedtech, our slings are expertly crafted to meet a wide range of caregiving needs.

Our range of slings—*Luma*, *Viva*, *Aura* and *Nova* - are thoughtfully designed to support patients in various situations, from daily transfers to specific needs like bathroom assistance, showering, and transportation. Each sling features a soft, skin-friendly inner lining that prevents chafing and provides lasting comfort, even during extended use. With well-designed support to minimize pressure and avoid skin irritation, our slings ensure a gentle, comfortable experience.

For added security, each sling includes hand supports for easy guidance and an adjustable safety belt to prevent slipping during transfers. These features keep patients stable and comfortable, enabling safe and controlled movement in any setting.

Toilet, bathroom, transport, neck support

LUMA: ENHANCED SUPPORT FOR COMPLETE MOBILITY

The Luma Sling is crafted with a higher neck support and a wider lower opening, providing added comfort and accessibility for various transfers.

Designed for versatile use, the Luma Sling is ideal for tasks such as transportation, restroom visits, and even showering, offering dependable support for both patients and caregivers in a wide range of settings.

Its functional zipper allows for adjustable configurations, enhancing adaptability across different needs.

With a thoughtful design that ensures comfort and stability, the Luma Sling is a practical choice for everyday mobility.

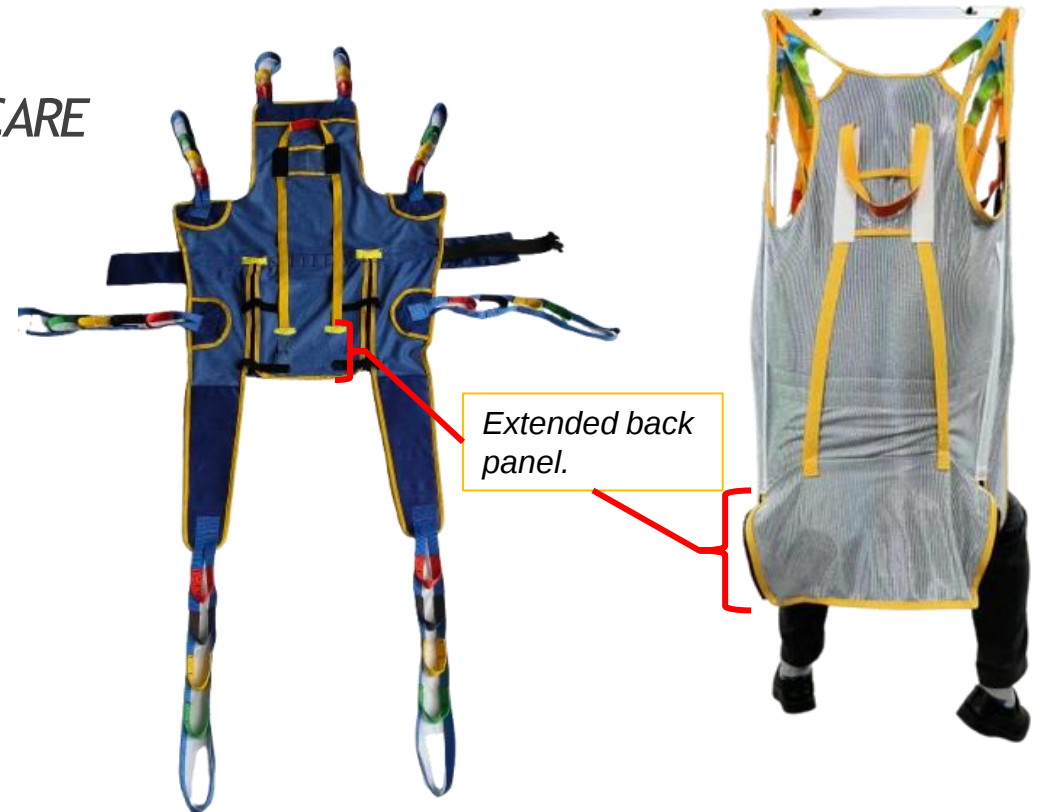

Toilet, bathroom, transport, neck support

VIVA: MAXIMUM COVERAGE FOR DIGNIFIED CARE

The Viva Sling is designed with high neck support and an extended, wider lower opening, offering both comfort and privacy during transfers.

With an extended back panel, the Viva Sling provides additional coverage, which is especially useful for maintaining patient discretion after restroom visits, during bathroom use, or pre/post- operation.

The functional zipper allows for adjustable configurations, enhancing its adaptability for various needs. Ideal for transportation, restroom use, and showering, the Viva Sling combines flexibility with thoughtful design to maintain patient dignity and comfort.

Toilet, transport, neck support

!Not recommended for use in the bathroom or shower. If used, ensure it is thoroughly dried afterward.

AURA: UNIVERSAL SUPPORT WITH SIMPLE DESIGN

The Aura Sling is our versatile, universal Levomedtech design option, designed for secure and comfortable transfers across a range of needs. Its compact design supports larger patients with a more closed lower section for added coverage, while the neck support remains effective for transfers to and from beds, wheelchairs, and cars, as well as restroom use.

Ideal for general mobility, the Aura Sling's functional zipper allows versatile configurations, making it adaptable for bathroom, restroom, and transport needs. Custom modifications are also available to suit specific requirements.

Toilet, Comfort transport with neck support

!Not recommended for use in the bathroom or shower. If used, ensure it is thoroughly dried afterward.

Nova: UNIVERSAL SLING WITH EXTENDED NECK SUPPORT

The Nova Sling is our specialized Levomedtech solution, designed for safe and comfortable toilet and transport transfers. Its compact design provides secure support for larger patients, with a more closed lower section for enhanced coverage, while the reinforced neck support ensures stability during transfers between beds, wheelchairs, vehicles, and restrooms.

Ideal for bathroom and mobility needs.

Custom modifications are available to accommodate specific user requirements.

Our slings offer an all-in-one solution, replacing multiple products on the market.

Surgical Gowns & Undergarment Series

Surgical gowns are essential protective garments during surgical procedures. In addition to meeting the required material quality and safety standards, medical surgical gowns must also provide protection, comfort, hygiene, and resistance to high-temperature and high-pressure sterilization.

Undergarments, worn as base layers by medical professionals, offer a wider variety of colors, fabrics, and styles compared to surgical gowns, ensuring both functionality and personal comfort.
